## Ontario Farm Accounting Workbook

The Ontario Farm Accounting Workbook was developed in Excel format to help you in managing your farm business. It is designed to meet the farm business record keeping needs for commercial farms. It is simple, yet complete enough to provide details for tax purposes, for credit and for an analysis of your farm business. Version 5 was released in 2011. The workbook has been updated with AgriStability program and Harmonized Sales Tax information. The ability to allocate revenue and expenses to individual enterprises has also been added along with cost of production reports based on those allocations. A basic knowledge of Excel is necessary. This file does contain macros. You will need to set your macro virus security protection level in Excel to 'Medium' before you try to open the file. When opening the file you will be asked to enable or disable macros. Click "Enable Macros".
